CARE AND MAINTENANCE OF GOfAKE BRAND SYNTHETIC GRASS

Your Gofake lawn represents a significant investment to your property. Following these care and maintenance guidelines, you can prevent & protect your investment and extend the useful life of your Gofake synthetic grass.

The following procedures are key in maintaining to preserve your artificial grass. Gofake is only of the only synthetic grass leaders whom provide a care & maintenance guide, as we care about our product & customers.

- **Keep It Clean**
- **Brush periodically**
- **Do not abuse**
- **Report any problems promptly to your Gofake distributor**

Keep It Clean:

Dust, Pollen & airborne pollutants

Rainfall is the best cleanser. In areas where rainfall is scarce, an occasional water flush is beneficial to cleanse the fake turf. For lightly soiled areas, it may be necessary to sponge mop with a 5% solution of low sudsing household detergent in warm water (not hot water) followed by a thorough rinsing with cold water. Always use a hose to rinse out any left over detergents. (Do not ever use bleach or harsh chemicals)

Stains and other blemishes

The first rule is promptness. It is always easier to clean up a fresh spill than one that has dried and hardened. Remove any solid or paste-like deposits with a spatula or table knife. Blot up excess liquids with paper towels, a clean cloth, or a dry absorbent, such as kitty litter or fullers earth product. Dry absorbents can then be swept or vacuumed up afterwards.

Synthetic fibres have good resistance to staining. However, it is important to realise they are only one part of a sophisticated system of various components designed for overall performance. Some cleaning agents safe for the face fibres can be harmful to other components of the turf system. Therefore, cleaning agents are grouped into two sets, one of which can be used in liberal amounts directly on the turf surface, and the second of which should only be applied by rubbing a cloth soaked in the cleaner in order to minimize penetration of possible harmful agents below the turf surface. In the first group of cleaners which generally can be applied without special precautions are following:

- "Simple Green", a bio-friendly cleaner. Follow the manufacturer's instructions.
- A warm, mild solution of granular household detergent or any low sudsing detergent for fine fabrics. Use approximately one teaspoon to one pint of water.

This will handle most waterborne stains including:

Coffee	Ketchup
Tea	Butter
Fruit juices	Alcohol
Vegetable juices	Cola
Milk	Water colours
Cocoa	Latex paint
Ice Cream	Blood
Mustard	Urine
Glue	Dye

- A three (3) percent solution of white vinegar in water may be used in lieu of household detergent for more stubborn stains.
- Do not use cleaners that contain chlorine bleaches or caustic cleaners (ph above 9) or highly acidic cleanses (ph below 5)
- Rinse area thoroughly with clean cold water to remove any traces of soap or ammonia
- Blot up excessive liquid

CARE AND MAINTENANCE OF GOFAKE BRAND SYNTHETIC GRASS

The second group of cleaners, where agent must be applied sparingly (1% to a 100% water mix) and care taken to avoid penetration beneath the turf are the following:

• Mineral spirits or a grease spot remover like perchlorethylene (dry cleaning solution) of the type sold by most variety stores and supermarkets. In general, cleansers in this category should handle most oil-based stains including:

Asphalt and tar

Chewing gum

Cooking oil

Shoe polish

Floor wax

Lipstick

Motor oil & grease

Paraffin wax

Ballpoint ink

Nail polish

Suntan oil

Crayon

Caution: mineral spirits and other petroleum based solvents are flammable. Do not smoke or permit open flames near where these are being used. Be sure the area is well ventilated where solvent cleaners are used.

C. Animal waste

Neutralize with mixture of white distilled vinegar in an equal amount of water. Flush thoroughly with water after application.

D. Chewing gum

In addition to dry cleaning fluid, chewing gum can be removed by freezing. Aerosol packs of refrigerant are available from most carpet cleaning suppliers for this purpose, or dry ice can be used. After freezing, scrape with a knife.

E. Fungus or mould spots

Neutralize with mixture of white distilled vinegar in an equal amount of water. Flush thoroughly with water after application.

F. Oil paints and more difficult stains

Please consult your Gofake distributor on 1300gofake or purchase through the online store as these may require a commercial synthetic grass cleaner.

II. Periodic brushing

Matting of fiber's may occur in areas of high foot traffic, especially if fiber's have become soiled with dirt and other airborne pollutants.

Periodic "cross brushing" of the turf can help restore the aesthetic appearance of the turf. "Cross brushing" means all brushing activity takes place against the grain, nap, or sweep of the turf fiber's. By brushing against the turf, the fiber's are "fluffed up". A brush with synthetic bristles should be used. Never use a brush with metal or wire bristles as these will change the turf fiber's.

III. Do not abuse

Although your Gofake brand synthetic grass is made of tough, durable fiber's, certain precautions should be taken to prevent damage to the turf.

- Lighted cigarettes cannot ignite the turf, but they can damage the turf by fusing the tips of the fiber's together. Cigarettes, fireworks, and open flames should be kept away from the turf.
- Furniture and equipment with sharp or jagged edges should not be placed on turf as this may puncture or tear the turf.
- Never leave a parked vehicle idling on the turf.
- Cap off or remove nearby sprinkler heads. Water from sprinkler systems can leave mineral deposits on turf that may cause discoloration.
- Make sure turf is not exposed to reflected sunlight windows as this may fuse the turf fiber's together.

IV. Report any minor problem

Minor problems can become major problems quickly if not corrected. Any problem should be reported promptly to your local Gofake Distributor.

V. Conclusion

The proper care and maintenance program can enhance the aging, usefulness, and aesthetics of your Gofake brand turf. Ask your Gofake dealer about their low cost maintenance program.
